(54) NAVIGATION SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To immediately search for a route to a next passing point when a proximate passing point is not passed.

SOLUTION: This navigation system includes a re-searching key 74 for re-searching a route from a present point to a destination which passes a passing point after the proximate passing point when the passing point is set and the re-searching key is operated.

LEGAL STATUS

[Date of request for examination] 20.09.2002

[Date of sending the examiner's decision of rejection] 30.09.2003

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision]

of rejection]

[Date of requesting appeal against examiner's
decision of rejection]

[Date of extinction of right]
